Availability of U.S. Patent Classification Microfilm Publications

The Patent and Trademark Office announces the availability of new editions of two patent classification microfilm publications: "U.S. Patent Classification—Subclass Listing (PTO 002.1–7912M) and "U.S. Patent Classification—Numeric Listing" (PTO 001.1–7912M). Both publications are dated December 1979 and reflect new patent issues and reclassifications through the end of the month.

The "U.S. Patent Classification—Subclass Listing" presents in sequence by the classes, subclasses, and digests of the U.S. classification system, the patent numbers of the U.S. patents which are classified as "originals," "cross references," and "unofficial cross references" in each of the subclasses. Within each subclass, the patent numbers are listed in numerical sequence. Symbols appear in conjunction with patent numbers to denote those patents which are classified as cross references in a subclass.

The "U.S. Patent Classification—Numeric Listing" consists of a listing, in ascending numeric sequence, of all U.S. patents and related items together with the original and all cross-reference classifications (both "official" and "unofficial") for each patent current as of the date of publication.

Both of the above publications are offered for sale by the National Technical Information Service in 16mm microfilm on plain (open) reels or in any of three types of cartridges—3M, Recordak, and Kodak "Thread Easy" magazines. They may be purchased in sets or by individual reel.
